

Iowa State University

Dairy Science Student Profile

Name: Trent Westhoff
Hometown: Dyersville, Iowa
High School: Beckman Catholic High School
Class Size: 79
Farm Name: Westhoff Farms
Major: Animal Science

Why did you decide to attend ISU? Iowa State offers their students endless opportunities. I was able to experience this first hand from the multiple FFA events and college visits I attended on campus throughout high school. Talking with past ISU students reassured my decision as they had nothing but good things to say. On each visit, Ames and Iowa State felt like home to me. In addition, the programs and professors offered in the College of Agriculture and Life Sciences rank among the best in the world so I was confident in my decision.

What has been your favorite course? I have had many awesome classes already. Some of my favorites were animal anatomy lab, embryo transfer class, animal nutrition, and my species classes in beef, swine, and dairy. I look forward to some of my higher level classes to come as well.

What are your future career goals? My goal after graduation is to remain active in the dairy industry through a career in nutrition or animal health.
