

Iowa State University

Dairy Science Student Profile

Name: Brylie Volker
Hometown: Sumner, Iowa
High School: Sumner Fredericksburg High School
Class Size: 78
Major: Agricultural Business

Why did you decide to attend ISU? I made my decision to go to Iowa State at a very young age. Wanting to go into some agricultural field, I knew that ISU would be the school for me. It wasn't until my junior year of high school, that I decided to go into ag business.

What has been your most memorable college experience? My college experience hasn't been normal or by the book due to the pandemic, but I would have to say my most memorable moment was the late nights in the dorms hanging with friends and making multiple memories. I don't think I could narrow it down to just one moment because all of them have been pretty unforgettable. I'm grateful for all the friends that I have made and the experience I have had!

What has been your favorite course? By far, my favorite course would have to be Animal Science 114 (Survey of the Animal Industry). I enjoyed learning about every animal industry more in-depth. I was able to get a better understanding of what goes into each aspect of livestock production.

What are your future goals? I want to stay in the dairy industry and find a job that combines my passion for cattle and the people who hold the same view. Whether that be working in sales, marketing, or public relations, I would love to stay in the industry.
