

Iowa State University

Dairy Science Student Profile

Name: Tehya Demmer
Hometown: Dundee, Iowa
High School: West Delaware High School
Class Size: 106
Farm Name: Demmer Dairy
Major: Animal Science

Why did you decide to attend ISU? When I decided my career path, I created a list of schools that would help me reach my goals. Iowa State offers many opportunities to help students figure out their path and allows students to become involved on campus in many different ways.

What has been your most memorable college experience? When reminiscing on all the memorable moments at ISU, I struggle to pick just one. I would have to say that playing intramural sports with the dairy science club. This fall we competed in the softball intramural, and we always had a wonderful cheering section and team "moms" who would bring Capri Suns and snacks.

What has been your favorite course? So far, my favorite course has been my dairy cattle science class. I love learning more about the industry and seeing my peer's ideas in opinions in our class discussion questions. This class also has a lab portion where we can go to the dairy farm and gain hands on experience with the cows and tools we are leaning about.

What are your future career goals? After graduating from Iowa State, I hope to begin Veterinary School to pursue my dreams of becoming a production animal veterinarian.
