

# *Iowa State University*

## *Dairy Science Student Profile*

**Name:** Trevor Malven  
**Hometown:** Cresco, Iowa  
**High School:** Crestwood High School  
**Class Size:** 105  
**Farm Name:** Malvencrest Holsteins  
**Major:** Dairy Science

**Why did you decide to attend ISU?** Showing cows in 4-H and FFA and going to judging contests raised my interest in wanting to pursue a secondary education in dairy science. I talked to several people who went to Iowa State and majored in Dairy Science and heard lots of good things about the program. Iowa State is also one of the most affordable 4-year colleges in the area, so that helped with my final decision.

**What has been your most memorable college experience?** This fall my brothers and I went to the Iowa vs. Iowa State football game. My brothers had never been to a college football game before. It was one of the most exciting football games I had ever seen even though Iowa State lost.

**What has been your favorite course?** My favorite class so far has been Dairy Cattle Science. I like learning about the science behind why we do certain practices on the farm and learning completely new concepts. I also like getting to go to the Iowa State Dairy Farm to work with the animals and apply the classroom material to the real world.

**What are your future career goals?** After graduation, I would like to work as a nutritionist or a dairy consultant and help farmers reach their goals. I'm not sure about going to graduate school yet. Eventually I would like to get back into farming.
