

Northeast Iowa Community College

Dairy Science Student Profile

Name: Becca Hermann
Hometown: Manchester, IA
High School: Dual Enrolled - Homeschooled
& West Delaware High School
Class Size: 75
Farm Name: Lindsey Creek Acres
Major: Dairy Science Technology

Why did I decide to go to NICC? Being homeschooled, though I had college credits from high school, I needed to attend a two year college because I did not have a high school diploma. NICC, Calmar provided a degree in dairy science close to home and with wonderful staff and facility who truly care about their students and want them to succeed.

My most memorable college experience: Being inducted into Phi Theta Kappa honor society and seeing Dr. Wee, president of NICC, welcoming all the students as they arrived on the first day of classes.

What has been my favorite course? Applied Animal Disease Prevention taught by Dr. Chris Harvey. I have learned how to detect when an animal is sick; what treatment will take place; how to check for certain diseases in animals.

What are my future career goals? After NICC, I plan to attend SDSU for Dairy Manufacturing. I hope to return to the family farm and start our own on farm processing.
